
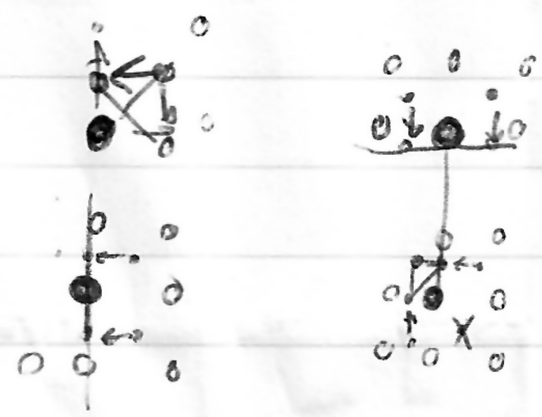
Normal
move top + bot borders

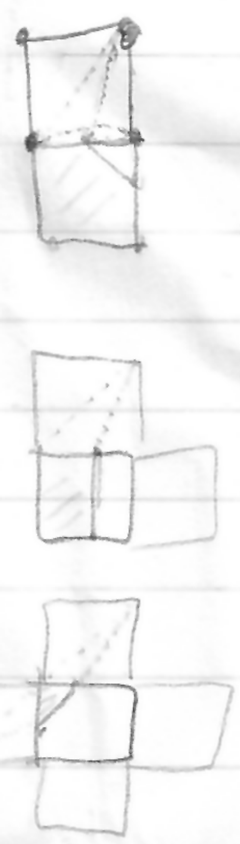
Difference
move bot borders
make extra ~~top~~ bot surface
where border was moved from
make extra border surface if
border is along a single nudged
corner



bot surface...

if cell elevation < min elev
check if corner 3 neighbors are
< min elev
if den(corners to be nudge)
== 1 : ...
== 2 : ...
== 3 : find middle corner
nudge middle corner
== 4 : cell corners
should all be
below z = 0

if not surface polygons
nudge corners, store original corners
if difference mesh – nudge bot
else – nudge top + bot

borders...


if nudged edges + difference mesh
add new borders if border has
nudged corner
